SUBSCRIPTION \$2.00 PER YEAR

## Councillors Transact Much Business At Last Meeting

At the last regular meeting of the town council quite a lot of business was transacted. Mr. H. E. Lester reported that he had attended a meeting in Calgary of the Municipal Rural Hospitals Board on behalf of the town. Nothing definite had been decided at the meeting, and it was not known yet whether the hospital would go in built or whether they would go in with some other hospital.

Councillor Hunter reported in connection with the proposed new armories. The District Officer Commanding, Military District No. 13 invited Gleichen to pick out a location for the armories. After inspecting various sites, the eight acres north of the school were selected. The town was asked to deed this plot to the Department of National Defence for the purpose of the armories. The meeting decided to transfer the eight acres to the Department of National Defence.

The secretary was instructed to write a letter to the Gas and Oil Products Ltd. of Calgary regarding their application to purchase the purchase of property north of the water tower.

A little time later a letter was being made in connection with the removal of garbage. This was to be all cleaned up the first month. The master will be locked into.

The tenement of Thomas Jones for the Shadwell house and lots was accepted.

The sale price was \$800. Mr. Jones is to pay half of this year's taxes.

Mr. McQuade, the successful bidder for his bid. His bid was \$500. Under the agreement of sale he is to move the barn away and the ground and well are to be left in good condition.

The master of the letter of the Shoprite Store regarding damage caused by sewer water backing up into the basement was tabled for an other meeting.

A leak in the theater line leading to the telephone office had developed. It was necessary to shut off the water from two other buildings to make the repairs, so a fact that there was only one sheet of paper available, the engineer was instructed to have this remedied in order that the houses in question could have water service.

A long discussion took place in connection with the new well at the water tower. This well had been put down to 300 feet, and the cylinder had been placed down to a depth of 160 feet. As very little water was available it was suggested that pipes be lowered as far as possible. It appears that the well had filled in and was now only 300 feet to the mud. It was decided to have the pipes put down as far as possible and a team of horses used.

A bill was passed providing for a discount on prompt payment of current general taxes of 5 percent, if paid on or before the 31st of July, 1946.

A letter from John Boyd was read dealing with land lying illegally below deposited on land belonging to Mr. J. O. Boggs, and requesting compensation for the town's use of some two acres of land over the years. It has been used for many years to store and to remove to take immediate measures to clear the accumulation of rubbish now resting on his lands. This matter was given considerable discussion. It appeared that the signs were given to the citizens of Gleichen to remove the rubbish to be dumped. It was finally decided, however, that if rubbish had been dumped on Mr. Boggs' land that an endeavor be made to purchase this piece of land in question from him.

Some information and prices were submitted in connection with fire alarms. The secretary was instructed to write to Speltex where one of its alarms was installed and obtain information regarding a particular type.

The question of bicycles riders caravanning around on the sidewalks was given some discussion. This matter will be taken up again.

The filling of bones on lots in town came up for discussion. It appeared that Mr. Crossett was dumping bone by the ton on his lots until he had enough to make a carload when they would be shipped away. However,

the warm weather caused a disagreeable aroma to arise from the bone pile and this was considered unsanitary. The secretary was instructed to notify Mr. Crossett to remove the bones to a suitable limit on the ground where the bones had been.

Mr. Suttermister asked permission of the council to remove a tree from the corner of 4th Avenue and Gleichen Street. Council granted him permission.

The minister of employing Mr. S. E. Lester to look after the affairs of the town was discussed. He is still in the armed forces and it was understood that he would be willing to take care of the town. Council was asked to obtain his release.

The secretary was instructed to communicate with Mr. Lester and obtain from him the procedure necessary to obtain his release, and also as to what renumeration he would receive if he came back to work for the town.

The cement sidewalk was broken near the corner of Anderson Hardware. The Public Works committee was requested to have it repaired.

The picnics date for the waterworks was set for June 26th.

James Young was caretaker of the hall receives \$10 a month and one dollar extra for dances. This was at a time there was one show a week. There was no third dance a week required. The caretaker's amount of work was \$10 a month. It was decided to pay Mr. Young \$15 a month and \$1 extra for each dance that was held in the hall, effective from June 1st.

The hall was to be cleaned and painted. Major Young had been purchased from the lumber company and work of fixing up the hall had been started.

## OBITUARY

MRS. A. E. RICHARDS

Mrs. R. C. Richards, wife of Mr. E. B. Richards, died suddenly midnight Sunday night in the Bassano hospital after several weeks illness. She was born in Port Hope, Ontario, and with her husband farmed for many years in Manitoba before moving to Alberta.

Funeral services were held Tuesday afternoon at 2 o'clock at St. Andrew's Church with Rev. D. A. Ford, B.A., officiating, after which interment was made in the local cemetery.

The pall bearers were Messrs. T. Robison, G. T. Jones, Dr. Hoyt, T. Baker, Major A. F. Parkinson and S. Hampton.

## FROM THE FILES OF THE CALL

### TWENTY YEARS AGO

Miss Anna McLean spent the weekend visiting her friends in Gleichen and is now taking a business course in Calgary.

Miss Woods (nee Miss Bowes) of Calgary spent the weekend visiting Mrs. T. H. Beach. Her numerous friends were pleased to see her once more.

There never was anything steeper than the hillside Gleichen and while visiting the formation of the Canadian Club last Friday night, and well might the gentlemen who came from Calgary be proud of the success they attained here. One hundred and twenty-four hundred dollars were given in the hall. The guests of honor and also the organizers from Calgary were: Judge L. F. Clary, P. O. Savary, K.C., Judge W. MacDonald, Inc. of Spalding of the R.C.M.P.

The Bow River Baseball League has been organized with five teams: Minto, Queenstown, Arrow, Five Mile, Meadowbrook and Gleichen. The five teams are said to have excellent lineups.

The new band stand adjoining the Community Hall is rapidly approaching completion and soon there will be a regular band heard throughout this material.

George Bell broke the record the other day for this season of sliding into base head-on at Meadowbrook. He made it alright, although unaware of it, several minutes after he got out of breath.

George Bell broke the record the other day for this season of sliding into base head-on at Meadowbrook. He made it alright, although unaware of it, several minutes after he got out of breath.

Clean-up day was duly observed in town last Wednesday. All stores were closed for a while that afternoon and practically the entire population turned out and spent the time cleaning up the streets, lanes and vacant lots.

## Public Meeting Informed Use of Proposed Armouries

A public meeting was held in the Gleichen Community Hall Monday evening for all those interested in seeing an armory erected in the town by the Dominion Government Department of Defense.

Mr. Rupert Hunter acted as chairman and he called on Major Young, Capt. King from Military District No. 13 addressed the meeting. Major Young dealt principally with its intentions as regards future plans and Captain King with the training angle.

It was pointed out to those present that defense plans for the future have changed materially from those of the past, the intention being to have a permanent force of 25,000 men and a reserve force of about 100,000. The reserve will be spread all over the Dominion and in order to supply them with equipment, armories will be erected in various parts of the country.

As we proceed along the road gains and advances are made and this will by definition of citizenship is intended to inspire patriotism and pride in our country. In referring to the proposed armory Major Young said for "A Canada single-handed in aim and purpose utilizing for the good of all what property is the inheritance of all."

A Canadian woman who married a non-Canadian retains her Canadian citizenship without taking any action to that end. There is a provision by which she can renounce her citizenship and also later, if she so desires, she can regain or reacquire it.

A Canadian citizen is a British subject and has all the rights of a British subject in any part of the world. A Canadian woman, for example, who is a subject of Canada and living in U.S.A. subject and living in U.S.A. may be an American subject under their laws but she can retain Canadian citizenship by making a declaration.

Section III of Part One of the Canadian Citizenship Act states "when a person is required to state his national status any person who is a Canadian citizen may so state and this shall be good evidence of his Canadian citizenship." This is a very definite statement.

At times for the purpose of statistics regarding racial origin a person may be asked about place of birth or place of residence but for other purposes this answer will suffice.

As we proceed along the road gains and advances are made and this will by definition of citizenship is intended to inspire patriotism and pride in our country. In referring to the proposed armory Major Young said for "A Canada single-handed in aim and purpose utilizing for the good of all what property is the inheritance of all."

F. W. GERSEBACH.

Canadians are asked only to share their abundant food supplies with the starving of the wartime countries. They must share if peace is to come. This can be done by substituting vegetables and fruit for bread, cakes and pastries, every individual can make a personal contribution toward increasing Canadian shipments of wheat and flour.

This is a practical way to work for enduring peace.

Burned toast feeds easily! That slice of bread which goes up in smoke in the breakfast rush is part of the waste which Canadians are asked to eliminate in order that there may be more bread for the hungry. One slice of waste bread is equal to one Canadian household means a waste of 1,200 98-pound bags of flour, or more than 11,000 24-ounce loaves. Thousands of tons of bread which is bought and buying only what is needed. Every man, woman and child in the Dominion can add a little to the world's stockpile of foodstuffs by eliminating waste.

INCREASED PRIZE MONEY IN ALL EVENTS

ADMISSION: grounds, 25¢; Grandstand, advanced, \$1.00 and 50¢; Evenings, \$1.00, 75¢ and 50¢—all grandstand seats reserved.

WRITE for test instructions accompanied by cheque or money order direct to  
Calgary Stampede, Calgary.

**A Loss To The Nation**

**CONSIDERABLE CONCERN** has been expressed here recently over the large numbers of men and women with professional training who are leaving Canada to live permanently in the United States. It is acknowledged that the greater wealth and wider opportunities which are offered by the large and growing American market have been a factor in this exodus. In fact, a number of Canadians each year, but these numbers have increased greatly since the war, and have now reached an extent which is regarded by some observers as alarming. The situation has caused the question to be raised here as to why so many of our citizens must seek opportunities in the United States, and as to what effect the exodus of large numbers of engineers, scientists and others trained in our schools and colleges may have upon the future of this country. . . .

**Is Essential  
To Security**

The present exodus appears to be largely of those who are seeking opportunities, and much may be explained in part by the fact that with the start of the compulsory military service regulations there during the war. As a result, the number of graduates during the war years was greatly reduced, and this had left the United States with an acute shortage of technically trained persons in all fields of endeavour.

The fast remains, however, that those who go from Canada to take up work in the United States, will devote their training and ability to their work there, and their services are lost as far as their own country is concerned.

The war has shown the importance of scientific and technical knowledge in all walks of life, and it is apparent that under present circumstances, scientific progress is being made in the United States, and this is to its industrial expansion. Under these circumstances, it is understandable that there is concern over the flow of trained Canadian scientists to another country.

**One Solution  
To Problem**

Scientific Canadians who are attracted to the United States are not only those with scientific and technical training. In music, education, the theatre and many other branches of learning, people of Canadian birth have achieved outstanding success in the United States. It is a matter of regret to see Canadian women interested in music, the theatre and drama, or art, and in particular in the field of education, have eventually been attracted by the greater opportunities available in the United States. Obviously the only solution to the entire problem is to develop facilities here for using the abilities of the men and women who are trained in this country. Dean C. J. MacKenzie, president of the University of Alberta, has recommended a special research budget equal to that provided during the war, and in addition, that research be greatly increased until it reaches between forty and fifty million dollars a year. This would not only provide many openings for young scientists but it would also help Canada greatly among other nations in the field of science. This, and similar measures, are the solution to the problem as it exists today.

Victim Has Stopped

LONDON—At seven years of age Patricia Coulton looks no older than 18 months, with bright eyes and rosy cheeks, a permanent smile and play with other children.

Her mind and body ceased to grow after her bomb was exploded by a land mine in 1942, and she was buried under rubble for five hours.

"She has never smiled since that day," Patricia's mother said. "Sometimes she makes little noises as though she wants to speak, but doctors tell me she never will. They say she is incurable."

Patricia never notices anyone around her. Doctors say her life has stopped and she can never grow up.

Some authorities believe that nearly every American will be neared sighted a few centuries hence.

MENTHOLATUM  
Gives COMFORT Daily**National Parks****Plan For A Five-Year Extension  
Plan Is Outlined**

Broad plans for a five-year extension program for Canada's national parks were outlined in a Senate Committee report by R. A. Scott, director of the Lands, Parks and Forests Branch of the Resources Department.

He sketched briefly a scheme which would include a national zoological plan, improved facilities in existing parks, and the creation of new parks. Senator T. A. Cross, Minister of the Lands, Parks and Forests Branch, said there was need for further study in the development of the parks system.

Dr. H. F. Lewis, superintendent of wild life protection, was questioned about the possibility of establishing a national zoological garden. He said there was need for such a development in Canada. While no site had been determined, he said the best place in the main countries was to establish the garden near the National Capital.

James Hart, author of the National Parks Report, reported on a recent survey trip, said the main problem expected this year was to provide accommodation for all the visitors to the parks. Senator Cross, the Stead, publicity director for the park branch, urged a long term publicity program which both would attract tourists and inform Canadians about the value of their own parks—Ontario, he said.

WORKS BOTH WAYS

In a Hayava office building, a sign over the elevator reads: "Since there is a stairway in the building, there is an elevator." The elevator in the building is used by legitimate business persons with legitimate business over the second floor, the management is not responsible for damages incurred while using the elevator."

A sign over the stairway says: "Since there is an elevator in the building, there is a stairway."

Suggestions that the horse will become obsolete are foolish, Grant MacEwan, professor of animal husbandry at the University of Saskatchewan, told a Chamber of Commerce members of the province. Prof. MacEwan said the horse would continue to be useful in agriculture in spite of mechanisation.

**Price Control  
And Rationing  
Information**

Q.—Will any coupons expire in the month of June?

A.—Butter coupons R1 to R9 inclusive, and meat coupons M29 to M39 inclusive will be declared invalid as of June 30.

Q.—Will we be receiving another ration book?

A.—Ration book six will be distributed to consumers the week beginning September 1.

Q.—I recently purchased a summer dress. I am afraid that the material is very poor quality and is also coming apart at the seams. What should I do?

A.—You should always make sure that you place in safe keeping the tag which was attached to the article when you purchased it. This tag gives the size, price and gives the Wartime Prices and Trade Board license number of the manufacturer's license holder. You should then return your summer dress along with the label to the store from where it was purchased. If you are unable to find the store, send the dress and label to the nearest Wartime Prices and Trade Board office and the Standards Division will investigate for you.

Please send your questions or comments to the pamphlet "Consumer News" or the Blue Book in which you keep track of your prices, prices of the clothes, the dress and label to the nearest Wartime Prices and Trade Board office in your province.

**SAYS SISTER IN CONSPIRACY**  
Fraud—Wings—screen actress  
Deanna Durbin has sued her  
sister, actress Dorothy (latter  
now Mrs. Clarence D. Hickman),  
for conspiracy to commit  
fraud. Deanna charged that  
they conspired with another couple  
to deprive her of property valued  
at \$150,000.

**MAKES IT EASIER**  
For breathing, infants  
need less than the natural  
amount of breath, and above players,  
in long musical passages, have to  
pause and exhale before inhaling for  
the next breath.

Hog bristles were used as springs  
in watches of early times.

Answer to Last Week's Puzzle

**TASK WILL BE HARD**

Racial Tangle Will Complicate MacKenzie McDonald's Job in Ottawa

When Mr. Malcolm MacKenzie, as Governor-General, settles down to married life in Ottawa, he will find a wife who has come from a country from what he was accustomed to in Ottawa. He will be in a tropical country with relatively few white people and with a mixed population of Malays, Chinese and Indians. He has to try and make a Malay Union of them.

This is one of many difficulties which are likely to arise in the Malaya. There are twice as many Chinese as Malays in the Malaya states under the Sultans of the Chinese are in the majority, and in the so-called Federated Malay States again load.

This is a racial tangle that actually concerns political affairs. And this will be fully apparent in the different stages of development. The Malays are still largely a primitive people of the forest, while the Chinese are shopkeepers and commercial employees. And the Chinese include a number of educated members and manufacturers.

Europeans are now returning from Japan and from Japanese imperialism to take up their pre-war jobs throughout the country which is still a military garrison. Production and labour are slowly recovering from the shock of war. The troops are leaving and soon except for a Garrison which will go to the two main Malayan sources of wealth, the tin and rubber, are by no means developed. But labor is hard to get, the rubber plantations have been greatly neglected, and transportation facilities are still not up to the standard of what it used to be.

Meanwhile, the Sultans remain disinterested in the Federated Malay States and presumably one of Mr. MacKenzie's first tasks will be to bring them to a more reasonable state of mind—Ottawa, Citizen.

**Farm of Veterans**

Is Located 4 Miles North Of Swift Current

Nineteen men operating the only Co-operative farm for veterans in Canada have broken ground for a new farm at Swift Current, Sask. Clarence D. Hickman, station manager, said they planned to have 100 hens, 20 turkeys, 100 geese, 100 ducks, 100 pigs, 100 cattle, 100 sheep and 100 goats when the farm is completed. Ploughing is going ahead on a 24-acre basis and by summer's end co-operators hope to have 2,000 acres planted.

The veterans also have engaged in teaching work at schools at Swift Current, Sask., and 10 miles north of Swift Current, mortgaging the section to their farm.

Hog bristles were used as springs in watches of early times.

"Fire! Goodness, no! Since I've been serving Grape-Nuts Flakes for breakfast, my husband decided the stairs were too slow."

"Would you believe it. I've found that the more everyone I call, the more they are twin brothers running downstairs to taste that malty-rich, Chinese-flavored cereal. The taste of Post's Grape-Nuts Flakes."

"And you know, I've seen my family tear into my day's action with a ravenous appetite. I mean, the nourishment Grape-Nuts Flakes give them: carbohydrates for energy; pro-

**GEMS OF THOUGHT****HAPPINESS**

What happiness is, the Bible alone shows clearly and certainly, and points out that it leads to the attainment of it—Coleridge.

"Umm . . . I wish I step in for bowlers. Certainly—and I want you to try the simply grand truth. I've just had a day's action with a ravenous appetite. I mean, the nourishment Grape-Nuts Flakes give them: carbohydrates for energy; pro-

tein for muscle; phosphorus for bones; fat for energy; iron for the blood; and other food essentials."

"Umm . . . I wish I step in for bowlers. Certainly—and I want you to try the simply grand truth. I've just had a day's action with a ravenous appetite. I mean, the nourishment Grape-Nuts Flakes give them: carbohydrates for energy; pro-

tein for muscle; phosphorus for bones; fat for energy; iron for the blood; and other food essentials."

The strength and the happiness of a man consists in finding out the way to happiness, and in getting in that way, too.—H. G. Webster.

When mortal man bleeds his thoughts of existence with the spiritual and works only as God works, he is then in a condition of health and happiness, according to earth because he has not tasted heaven.—Mary Baker Eddy.

Happiness in this world, when it comes, comes suddenly. Make it the source of pure and lasting joy, and leads us to a wild-goose chase, and is never attained.—Nathaniel Hawthorne.

As we are now living in an eternity—Grenville Kiser.

**MONEY TO SPEND**

Taxi companies are doing a thriving business in the area around Montreal Lake, 80 miles west of Prince Albert. Taxi operators report that as many as 11 trips a day are made by tourists, who are willing to pay up to \$10 for a ride.

It costs \$30 to catch one. The trip costs \$30. Last winter's fare record, one of the highest on record, is believed to be the source of Indian money.

Brownish Root Rot of Cereals

From about the second week of June to the first week of July large areas of many of the wheat crops on the prairies are affected. Progress will be seen to turn yellowish brown in colour. This trouble is most frequently encountered in the more level land under cereal cultivation. It may reduce the yield of wheat on an average of ten percent, but in some cases barley may be attacked if grown after fallow.

Description.—A close examination of the wheat plants shows the trouble to be an incompatible root rot caused by a soil-inhabiting fungus known as *Puccinia*. The disease has become so well coloured, tillers have been reduced, sheaves are brittle and infected. Diseased plants are slower in maturing and thus become more liable to damage from early frost, leaf rust and head smut. One of the common wheat varieties is resistant to this disease.

Control.—The use of phosphate fertilizer by hundreds of farmers during the last 15 years has indicated immediately that the best single preventive control is the application of ammonium phosphate (11-48). This is best done at seeding time by using a fertilizer attachment to the drill. Twenty pounds per acre are recommended for the drier areas and 30 to 40 pounds per acre for moister conditions are more favourable.

Phosphate fertilizer largely rectifies the ill effects of the dry soil and the disease is checked by 10 bushels per acre. Nothing can be done about control this year, but next year take arrangements available for a fertilizer attachment available, and order your phosphate early.

**Irrigation And East Slope Forests**

When irrigation farmers look to the watershed of the east slope of the Rockies as the source of virtually all of Alberta's rivers, one point is often overlooked. A forest covered watershed at high altitude receives far less precipitation than does a watershed at low altitude. European scientific tests, accepted as authoritative by Canadian and American experts show that precipitation is 43 percent less at 5,000 feet than at sea level. The increase is as high as 84 percent at altitudes of 3,000, and it must be remembered that Calgary's altitude is 4,500 feet, with about the same amount applying to the wooded zone at the base of Alberta's mountain terrain.

Another well proven fact is that forests, such as those of Alberta, influence air conditions to a degree as much as 5,000 feet above the crest of the Rockies. When compared the precipitation falling upon a well-wooded mountain slope or valley, it is found as much as 25 percent more than the precipitation on treeless mountain terrain.

The key factor here is increasing amounts of water for irrigation and other purposes in Alberta is not only a question of the Rocky Mountains but of the condition of the forest resources that cover the lower mountain slopes. Irrigation, jobbing and timbering operations as in other provinces of Canada, and the upbuilding of the East Slope's mantle of woodlands becomes a subject of close interest to every one interested in irrigation.

An appeal to motorists to make certain that their cars are left properly locked when unattended has been made by officials of the Alberta Motor Association. In various centers of the province, car thefts have been reported of stolen cars and stolen violets. As precautions are taken, these may increase, though police are reported to be on the alert for such possibilities. Some interesting sidelights on auto theft have been furnished by the U.S. Secret Service. It has found that 85 percent of all auto thefts are committed by youngsters under 21 years of age. A special study in an eastern city disclosed that only 10 percent of the auto thefts were of the stolen cars had been left unattended with the key in the ignition switch. Also, 10 percent of the cars parked in the street either had the key in the switch or were easily accessible to the thief's view. The moral is—lock your car and keep the key.

Raw foods contain the maximum in nutrients and therefore smaller quantities of raw foods satisfy the appetite more quickly than do cooked foods. This is the finding of nutrition experts. It is also recommended that raw foods should be included in the menu every day.

**JUNE IS CENSUS MONTH IN WESTERN CANADA**

EVERY FIVE YEARS the Dominion Government assembles facts about Western Canada — facts which, when they are sorted out, will answer many vitally important questions concerning population, agriculture, housing etc.

To get these facts the Dominion Bureau of Statistics goes to the people themselves. No one else can supply so accurately the information which will guide all governments — Dominion, Provincial and Municipal — in policy-making during the critical years ahead.

This year is Census year, and June is Census month. A new and very important feature will be collection of facts on housing cities and towns of over 5,000 population.

This 1946 Census is of special interest because it will provide the first reliable picture of Post-War Canada. It is the Reconstruction Census.

IT IS IMPORTANT TO YOU, AND YOU CAN HELP—by answering all questions frankly and correctly when the Official Enumerator calls at your home. There is no reason to withhold information; the enumerator is sworn to secrecy and you can place absolute trust in him. Both he and the Dominion Bureau of Statistics will hold all information in strictest confidence; it can never be used against you by any tax-collecting or other agency or in any court of law.

It is compulsory by law to answer the questions, but, more important, it is good citizenship to reply . . . frankly and accurately.
